

## Day 1 : Android Studio Setup & Flutter Installation .

### Android Studio Installation Steps:

#### System Requirements

| Component | Minimum Requirement                    |
|-----------|----------------------------------------|
| OS        | Windows 8/10/11 (64-bit)               |
| RAM       | 8 GB RAM minimum (16 GB recommended)   |
| Storage   | 8 GB free disk space (SSD recommended) |
| Screen    | 1280 x 800 minimum resolution          |
| Java      | JDK 17 (bundled with Android Studio)   |
| CPU       | Intel Core i5 or equivalent            |

#### Step 1: Download Android Studio

1. Open your web browser.
2. Visit the link that headed to download section of Android Studio.
3. Click **Download Android Studio**.
4. Accept the Terms and Conditions.
5. Wait for the installer to download.

#### Step 2: Install Android Studio

1. Open the downloaded installer.
2. Click **Next**.
3. Select:
  - Android Studio
  - Android Virtual Device (AVD)
4. Click **Next**.
5. Choose installation location.
6. Click **Install**.
7. Wait for installation to complete.
8. Click **Finish**.

### Step 3: Initial Setup

1. Launch Android Studio.
2. Click **Next**.
3. Select **Standard Installation**.
4. Choose UI Theme:
  - Light
  - Dark
5. Click **Next**.
6. Android Studio downloads:
  - Android SDK
  - SDK Platform Tools
  - Emulator Components
7. Click **Finish**.

### Flutter Installation Steps:

#### 1. Install Git

1. Download Git from: <https://git-scm.com/download/win>
2. Run the installer and keep clicking **Next**.
3. Click **Install** → **Finish**.
4. Open Command Prompt and check: `git --version`

#### 2. Install Flutter SDK

1. Download Flutter SDK from: <https://flutter.dev/docs/get-started/install/windows>
2. Create a folder: `C:\src`
3. Extract the downloaded Flutter ZIP file into: `C:\src\flutter`

#### 3. Add Flutter to PATH

1. Open **Environment Variables**.
2. Edit the **Path** variable.
3. Add: `C:\src\flutter\bin`
4. Open a new Command Prompt and run: `flutter --version`

#### 4. Verify Installation

1. Open Command Prompt.
2. Run: flutter doctor
3. Accept Android licenses: flutter doctor --android-licenses
4. Press **y** for all prompts.

#### 5. Configure Android Studio

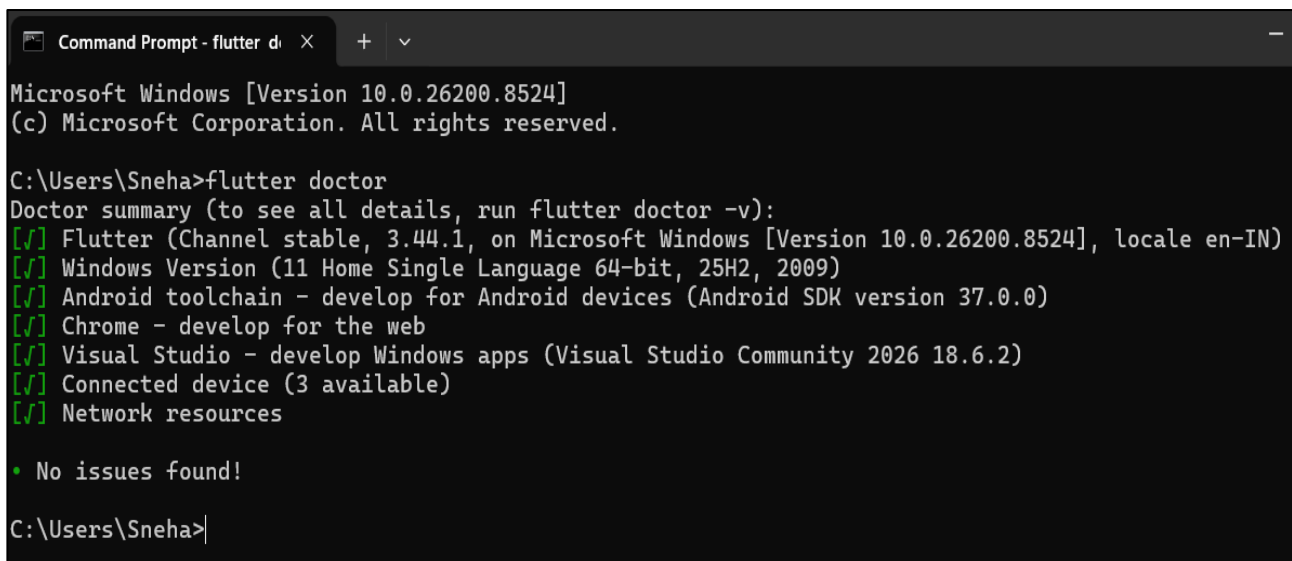

1. Open Android Studio.
2. Go to **File** → **Settings** → **Plugins**.
3. Search for **Flutter**.
4. Click **Install** (Dart plugin will install automatically).
5. Restart Android Studio.

#### 6. Verify Flutter Plugin

1. Open Android Studio.
2. Click **File**.
3. Check if **New Flutter Project** is available.

#### Result

- Git Installed
- Flutter SDK Installed
- Flutter Added to PATH
- Android Studio Configured
- Flutter Plugin Installed
- Flutter Environment Ready
